# Features

- Filings available as:
  - Original ZIP, as filed
  - iXBRL viewer
  - xBRL-JSON
  - Extracted ZIP
- Searchable and filterable index
- Index and metadata available as JSON
- Bulk download of all filings available to XBRL International members

# Goals

- Facilitate discovery of ESEF reports
- Make iXBRL data accessible through different formats
- Enable discussion of data quality issues
- Highlight the importance of validation and review

# Limitations

- Index is incomplete
- Update with new filings is not automatic
- Some filings cannot be loaded at all due to validation errors
- Relationship between multiple filings for the same company, date and language is not known
